**Consumer Confidence Report Ready**

Soon, every water utility customer in the City of Norman will be receiving their copy of the Consumer Confidence Report (CCR) in the mail. The City of Norman Water Utilities Department recently completed the tables, charts and information contained in the 2009 CCR. This annual report mailed to each customer is mandated by the U. S. Environmental Protection Agency (EPA). The purpose is to inform the public regarding water quality, consumer demand, and methods of conserving water. City Utility staff at the Water Treatment Plant continually tests the water throughout the treatment process everyday to ensure it meets, and in many cases exceeds the National Drinking Water Standards set by the EPA.

Additional copies are available at City Hall. The CCR can also be found on the City's website; <http://www.normanok.gov>.

The Water Utilities Department considers the CCR our opportunity to make every Norman citizen aware of our efforts to provide exceptional water service every day of the year. The City of Norman wants to let our customers know the water you drink is safe and meets or exceeds the EPA drinking water standards. We encourage consumers to become informed and help conserve our most precious resource.... water.
