The Robinson Street Underpass Project from 500 feet west of Flood Avenue to 500 feet east of Stubbeman Avenue is a \$25 million street improvement project approved by the Norman voters as part of the 2005 Bond Election. Construction began on the project on Monday, June 14, 2010. The Oklahoma Department of Transportation is responsible for the construction of the project. The prime contractor is Manhattan Road and Bridge of Oklahoma City.

Robinson Street from the east side of Flood Avenue to Fay Avenue is scheduled to be closed to through traffic on Wednesday, July 7, 2010 in order to install part of the underground storm drainage system. Weather permitting, Robinson Street will be reopened to traffic on Saturday, July 10, 2010. Robinson Street from Fay Avenue to Porter Avenue will be open to local traffic only. The temporary detour for all other traffic that previously used Robinson Street will be Rock Creek Road between Flood Avenue and Porter Avenue. Signs will be placed accordingly to direct the traveling public. Additional questions may be directed to John Clink, City of Norman Capital Projects Engineer, at 366-5424.
