Beginning Saturday, December 15, 2012, at 10:00 P.M., Silver Star Construction under contract to the City of Norman will begin the milling of the asphalt surface on Boyd Street between Jenkins Avenue and University Boulevard. Parking on the north side of Boyd Street between DeBarr Avenue and University Boulevard will be prohibited after 2:00 A.M. Beginning on Sunday, December 16, 2012, at 9:00 A.M., crews will commence the asphalt paving of the roadway. Multiple lane closures will take place and motorists are urged to use caution during the construction. Upon completion of this section, Silver Star crews will commence the milling and paving of the asphalt surface on Boyd Street between Jenkins Avenue and Classen Boulevard. Barricades will be placed to aid the traveling public through the construction zone. Work is anticipated to be completed by Thursday, December 20, 2012.

This pavement rehabilitation project is included in the City's FYE 2013 Capital Improvement Program. The project has been carefully planned for construction during the upcoming week to minimize inconvenience to the University of Oklahoma, Campus Corner and surrounding areas. The project will be completed before students return from their Christmas break.
