yardbyyard

Save time and money and add to your community's resilience by having a nature friendly lawn.

Find information at the link above. A few of the benefits you will receive are:

- Attractive Yard Sign
- Native Plant Seeds
- Alerts about Educational Opportunities
- Free Subscription to the newsletter of the Yard by Yard movement "Blades of Glory"

For more information, please contact Kevin Mink at kevin.mink@usda.gov

Your Yard Can Make the CUT!

The brand new Yard by Yard Project encourages residents in cities and towns to add strength, health, and resiliency to your communities! This can happen when yards are managed to *improve soil health and contribute to clean water.*

Join Sam the Resiliency Raccoon and his sidekick Flutter as they build habitat and good will in urban areas!

Add plant diversity, offer a water feature, grow some vegetables—the Yard by Yard Project has lots of suggestions! You will be amazed at the dragonflies, butterflies, birds, and other creatures that will stop by the wonderful habitat you create!

Bees and butterflies (like me!) do a big job. We pollinate lots of plants, meaning that many of the foods you enjoy exist because of us! I may not be a farmer, but I sure am a farmer's helper. Will you be a helper to me?
