

Norman Police Department Neighborhood Watch SafeCam Program

The Norman Police Department would like your help to solve crimes in your neighborhood. We strongly believe in the community-oriented policing philosophy, and have developed a program to tackle crimes through key partnerships with our citizens.

The Neighborhood Watch SafeCam Program is a way for the police department to work in partnership with you to maintain a database of camera locations that will help to identify suspects and solve crimes faster. The program allows owners to inform NPD about their security camera systems at both private residences and local businesses. It is completely voluntary and participation is free.

When a crime is reported in a particular area, the police department will contact the owners of camera systems in the area and request a copy of their video footage. This footage could assist investigators with developing leads in the investigation. The information provided by the owner of the camera system will not be available to the public nor will the video be subject to Open Records requests.

Register your camera system online by going to <http://normanpd.normanok.gov/content/safecam-registration>. You can also mail your completed form to the address listed below.

For additional information, contact NPD Crime Analyst Jason Redden at 405-366-5421 or by sending an email to safecam@NormanOK.gov.

SafeCam Registration Form

Last Name: _____ **First Name:** _____

Business Name: _____

Phone Number: _____
