

Program Description

Applicant seeks to construct, operate, and maintain an electric substation that will facilitate expansion and improvement of the supply, delivery, and reliability of electricity for the benefit of customers within the region. The proposed site consists of forty (40) acres and is located on the Southwest Corner of W. Franklin Rd. and 48th Ave. NW ("Property").

The subject property and surrounding properties are zoned A-2, Rural Agricultural District. The subject Property and the immediately surrounding property are currently vacant. The lot to the east of the Property consists of a residence and a substation. The lots to the north and south consist of residences.

Applicant will design, construct, operate, and maintain the substation in accordance with applicable industry construction and safety standards. It will be enclosed and secure with fencing to prohibit entry upon and within the fenced area and to exclude any and all persons, except those persons expressly designated and authorized. Due to the location of the Property and reasons set forth above, the use will not cause any adverse impact on the surrounding property owners.
